PROFESSIONAL SUMMARY

Full-Stack Software Engineer with a Bachelor of Computer Science and 5+ years of experience in software development, designing, developing, and deploying web applications with React, Next.js, Node.js, and Django. Brings 3+ years of experience in AI and social media management, integrating AI technologies such as OpenAI APIs, LangChain, and RAG into production systems, building automation workflows, and managing social media, paid campaigns, and ChatBot automation across multiple consumer brands. Strong in team leadership, remote collaboration, and full software development lifecycle management.

SKILLS

Full-Stack Development: JavaScript, TypeScript, React, Next.js, Node.js, Express.js, Python, Django, MERN Stack

Artificial Intelligence and Machine Learning: OpenAI APIs, Hugging Face Models, LangChain, Gemini AI, Retrieval-Augmented Generation (RAG), NLP, Model Integration, Python Automation

Frontend Development and UI/UX: HTML5, CSS3, Tailwind CSS, Responsive Design, Frontend Optimization, User Experience Design

Backend and Databases: PostgreSQL, MongoDB, SQL, NoSQL, Database Design, RESTful APIs, JWT Authentication, Microservices Architecture

Software Quality and Security: Unit Testing, Integration Testing, System Testing, Acceptance Testing, Security Best Practices, Performance Optimization

Social Media and Digital Marketing: Social Media Management, Content Strategy, Content Calendar Planning, Meta Ads Manager, Paid Post Boosting, Audience Targeting, Budget Management, ROI Optimization, KPI Tracking, Performance Reporting, Community Management

ChatBot and Marketing Automation: ManyChat, Chatfuel, Messenger and Instagram DM Automation, Website Chat, Lead Generation Funnels, A/B Testing

AI Content Generation Tools: Runway, Google Veo 3, Sora, AI-Powered Automation

Project Management and Collaboration: Team Leadership, Agile Methodologies, Remote Team Coordination, Git, GitHub

PROFESSIONAL EXPERIENCE

Social Media Management Officer

CupTime Trading W.L.L. | *Remote* | *Aug 2026 – Present*

- Manage organic and paid social media for multiple CUPTIME brands, including Aroom, Cuptime Services, Bincoo, and Barsetto, across Instagram, Facebook, TikTok, YouTube, and Snapchat.
- Monitor key metrics including engagement, reach, follower growth, and conversions, and deliver weekly and monthly performance reports with actionable insights.
- Plan, schedule, and publish organic content calendars while maintaining a consistent brand tone and visual identity across all platforms.
- Manage paid post boosts and advertising campaigns by setting budgets, defining target audiences, and optimizing for ROI.
- Design, build, and manage automated ChatBot workflows in ManyChat and Chatfuel for Messenger, Instagram DM, and website chat to support lead generation, customer service, and automated sales funnels.
- Run A/B tests on conversational sequences to continuously improve ChatBot performance metrics.
- Write creative briefs and review design drafts for social posts, website banners, and account page assets; support website updates, landing page content, and social account customization.
- Engage with the audience through comments, DMs, and mentions; curate user-generated content and track social trends, competitor activity, and platform updates.

Software Developer (Contract)
Wood Industries Union | *Gaza, Palestine* | *Apr 2023 – Present*

Technologies: MERN Stack (MongoDB, Express.js, React, Node.js)

- Lead a cross-functional team developing custom web solutions for industrial operations management.
- Architect and implement full-stack applications using the MERN stack.
- Manage end-to-end project delivery, including requirements gathering, development, testing, and deployment.
- Coordinate remote and on-site team collaboration to ensure timely delivery of high-quality work.
- Implement best practices for code quality, version control, and documentation standards.

Full-Stack Developer
ATM Maintenance System for Saudi National Bank | *Cairo, Egypt* | *Oct 2025 – Dec 2025*

Technologies: React, Django, PostgreSQL, JWT Authentication

- Engineered a comprehensive ATM maintenance management system serving multiple cities across Saudi Arabia.
- Developed role-based access control with JWT authentication supporting multiple user hierarchies.
- Built an automated reporting engine that generates PDF reports and email notifications for maintenance workflows.
- Implemented an Excel data processing pipeline for bulk maintenance request imports and data validation.
- Designed and optimized the PostgreSQL database schema for complex maintenance tracking and audit trails.
- Created a responsive React dashboard with real-time status updates and interactive data visualizations.
- Integrated an automated alert system that reduced average response time to critical maintenance issues.
- Delivered a multi-city maintenance workflow coordination system that improved operational transparency.

EDUCATION

Bachelor of Computer Science
Islamic University of Gaza (IUG) | *Gaza, Palestine* | *2018 – 2023*

CERTIFICATIONS

The LLM Course | Hugging Face | 2025 | Large Language Models, fine-tuning, and deployment

How to Use AI as a Personal Assistant | Gaza Sky Geeks | 2025 | Practical applications of AI tools and automation

Software Testing and Quality Assurance | BTI | 2023 | Testing methodologies, automation, and QA best practices

Web Development with Python and Django | San'a' Al-Mustaqbal Academy | 2022 | Backend development, ORM, authentication, and RESTful API design

ReactJS Bootcamp | Gaza Sky Geeks | 2021 | Advanced React development, hooks, state management, and modern patterns
